DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Herbst #5,634,508. Herbst, as best seen in Figures 3, 10-12, and 15-17, discloses a reversible door assembly comprised of two halves 11, 12, which can be snap fit together, thus forming a hollow interior, non-circular mortise apertures 40, 45, for receiving the hinge assemblies 46, and handle lock assemblies 41, 42, and as disclosed in columns 1-4, a method of installing the door.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herbst advanced above. Herbst fails to disclose an oval shaped notch/aperture and a template for forming holes. An oval shaped notch and the use of templates are an obvious design choice not expected to produce any new and unexpected results. Therefore, to one of ordinary skill in the

Art Unit: 3634

art, it would have been obvious to provide an oval shaped notch/aperture and a template for forming holes, while producing no new and unexpected results.
